DETAILED ACTION

Allowable Subject Matter

Claims 1-20 are allowed.

The following is an examiner's statement of reasons for allowance: prior art references do not teach or render obvious a dual panel type organic electroluminescent display device having the structure arrangement as claimed in claim 1, wherein the first pattern corresponds to the second electrode and has a height larger than a height of the partition walls and the second pattern covers the first pattern and is connected to the drain electrode and the second electrode.

Prior art references do not teach or render obvious a dual panel type organic electroluminescent display device having the structure arrangement as claimed in claim 11, wherein a plurality of first patterns are on the passivation layer, each of the first patterns corresponding to the second electrode and having a height greater than a height of the partition walls and a second pattern covers the first pattern and contacts the drain electrode and the second electrode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2811

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Reference A is being cited since it shows a pixel structure of an active matrix OLED display device.
